HOT WATER ONLY PRERINSE WASH PROCEDURES

In an effort to control the discharge of fats, oils, and greases (FOG) in food service facilities where appropriately sized grease interceptors cannot be installed, the Town of Cary authorizes the Hot Water Only Prerinse Wash Procedure. The Hot Water Only Prerinse Procedure promotes more effective FOG removal by isolation and removal of detergents in the prerinse process. Town official signature: _____

(Facility) _____ at (Location) _____ is authorized by the Town of Cary to use the Hot Water Only Prerinse Wash Procedure in-lieu-of ordinance stated requirement. This procedure is applicable to this site only and is not transferable to any other location, facility, or ownership. Failure to meet conditional requirements may result in enforcement actions taken against said facility.

WARE WASHING PROCEDURES USING 4-COMPARTMENT SINK

1. Thoroughly scrape all dishes and other ware into solid waste container prior to pre-rinse.
2. Thoroughly pre-rinse all dishes and cookware in designated pre-rinse compartment (usually 1st sink compartment) using hot water only. **No detergent used in this step.**
3. After pre-rinse, place dishes and cookware in the dishwasher or wash (2nd compartment), rinse (3rd compartment), and sanitize (4th compartment) in accordance to state restaurant sanitation rules in the remaining three sink compartments.

Note 1: Hot water heater requirements may need to be altered to adhere to sanitation requirements.

Note 2: This procedure is only valid if pre-rinse sink is discreetly plumbed to a dedicated manual or automatic grease interceptor. Dish/Pot machine must not be plumbed to grease interceptor when above plumbing configuration is used.

For information contact The Town of Cary Industrial Pretreatment Program at 919-462-3871 or 919-319-4564.

STATEMENT

I (Print) _____, understand and hereby agree to follow the Hot Water Only Pre-rinse Wash Procedure and agree to train operator(s) of wash station(s) to follow and adhere to said wash procedure. As person in responsible charge of (Facility) _____, I understand and agree that it is my responsibility to control the discharge of fats, oils, and greases to the Town of Cary collection and treatment system.
