

Community Activity Report

1.	Neighborhood	Regency Estates
2.	Class name and Instructor	Supported by Charles Brown, Water Resources Dept., Town of Cary
3.	Date, time and location when class was held	Informal activity spread over July/August
4.	Adult volunteer coordinator(s)	Patty Cervenka
5.	Youth volunteer coordinator(s)	-
6.	# of participants	11 (adults and youth)
7.	How was the Class advertised in the neighborhood?	Email and social media postings
8.	How did the class go? A brief description	<p>This was an informal activity completed over a period of 2 months by 4 teams. At the first meeting, the adult volunteer coordinator distributed supplies and provided guidance on how to stencil the storm water drains in the neighborhood. Supplies included water flow medallions, adhesive, gloves, tracking forms and a map of assigned part of the neighborhood. Thereafter, based on their convenience and availability, each group identified the storm drains in its assigned area and stuck the medallion on the drains (with the adhesive). The medallion will help create public awareness that the drains flowed directly into local rivers and waterways. The fish graphic on the medallion is intended to emphasize the fact that chemicals and other items in the flowing water adversely impacted the fish and other aquatic life in waterways.</p> <p>Approximately 150 storm drains were labeled by the teams.</p> <p>This was an atypical, and, labor intensive activity. Cooler weather might have been more appropriate for it. In spite of the hot summer weather, all participants were glad to be a part of this unique effort which has a long term</p>

		potential of creating awareness as well as incentivizing action from residents.
9.	Any green event guidelines followed?	Each participant used a refillable water bottle while stenciling. No food was served and unnecessary waste was avoided by using only Town of Cary supplies and returning the left-over supplies to the Town.
