

PREFACE

The purpose of the Standard Specifications and Details is to protect the health, safety, and welfare of Town of Cary citizens by regulating construction of infrastructure such that what is built is safe, reliable, and consistent throughout the Town.

The Standard Specifications and Details, which were initially adopted by the Cary Town Council on July 10, 1980, will be periodically reviewed by the Directors of the Transportation & Facilities Department and the Water Resources Department. These Directors may make minor revisions and implement them without formal adoption by the Town Council. The revisions, however, will be reviewed and duly adopted by the Town Council periodically.

The Town shall endeavor to notify the public of all revisions and periodic updates via the Town of Cary website, www.townofcary.org. Upon adoption by the Town Council, the revisions will be promptly edited and posted to the website.

It is the responsibility of the holder of this volume to maintain their printed copies of the Standard Specifications and Details by inserting the revisions as they are made and posted according to the above instructions.
