

Brandywine subdivision residents have requested the traffic calming plan shown on the attached map be considered for Traffic Calming on Brandywine Road. Town Council requires that 70% of the area of influence property owners support the proposed plan. Estimates are based on the attached conceptual plan. Town Council approval will be required to move forward with the proposal following submittal of a successful petition. Current planning level estimates are \$7700.00 with a required community match of 25% of the total construction cost which is estimated at \$1,925.00. *The Cary Fire Department does not oppose the draft concept of the traffic calming plan for Brandywine Road which consists of a single speed hump in regard to response times.* Please contact Jack Mewborne at jsmewborne@gmail.com, who is serving as your community liaison and can address any plan specifics. Please contact Rob Myers, Traffic Engineer at the Town of Cary if you have additional questions about the traffic calming program at 919-380-4236 or by e-mail at (rob.myers@townofcary.org)
