

CRABTREE CREEK GREENWAY

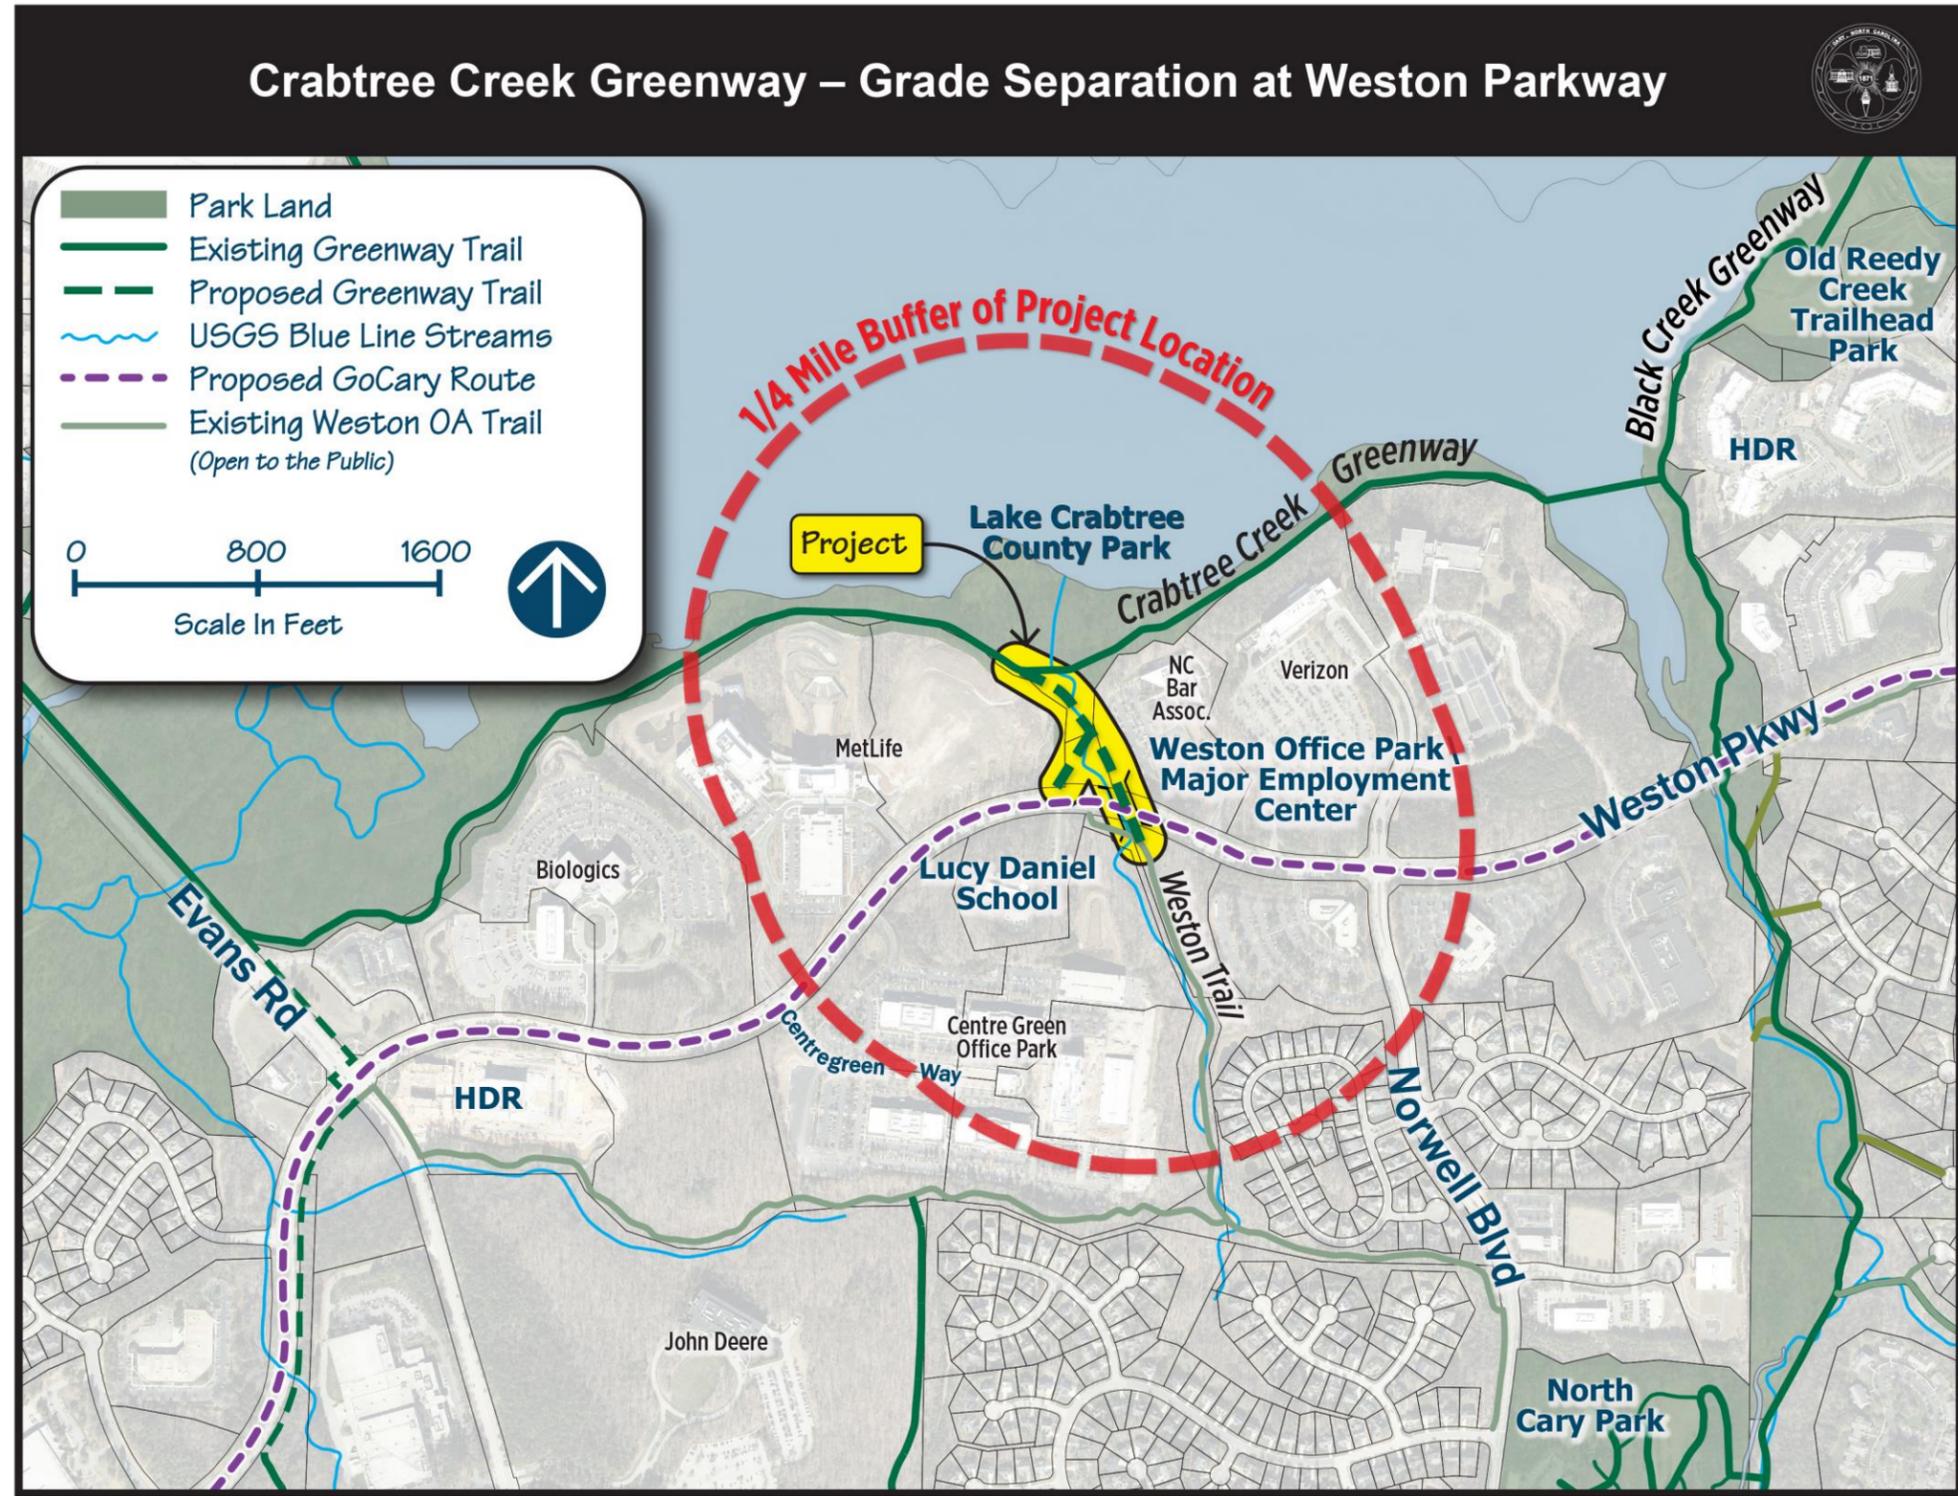

AESTHETIC OBSERVATIONS

for the TOWN OF CARY

VICKI SCURI SITEWORKS

January 22, 2020

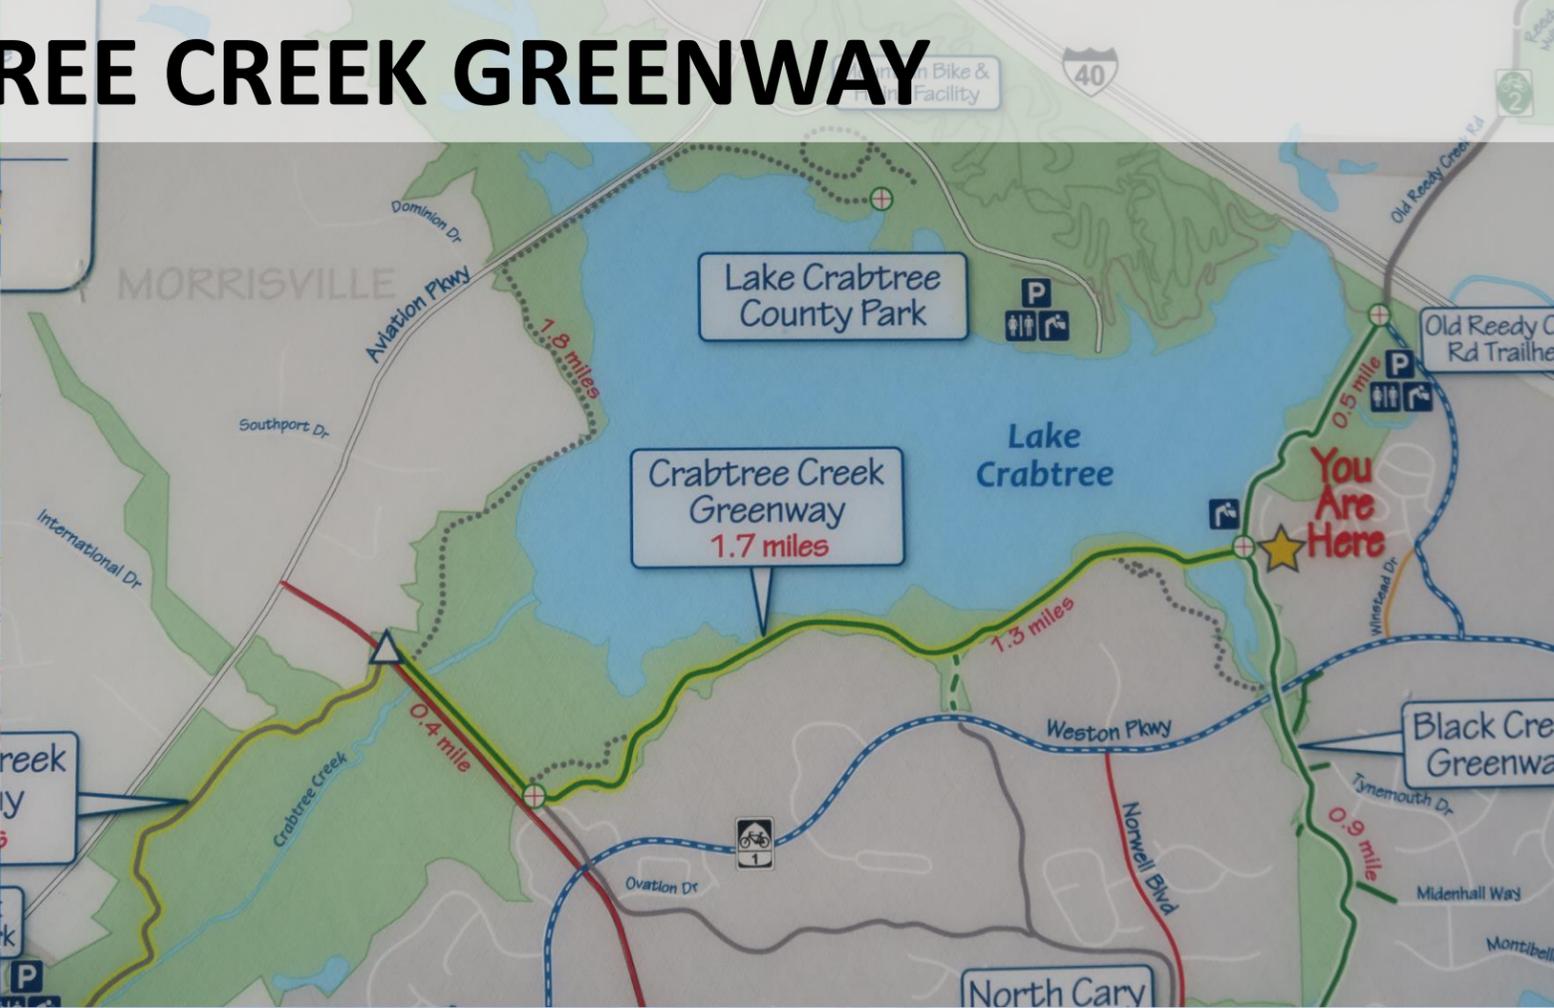

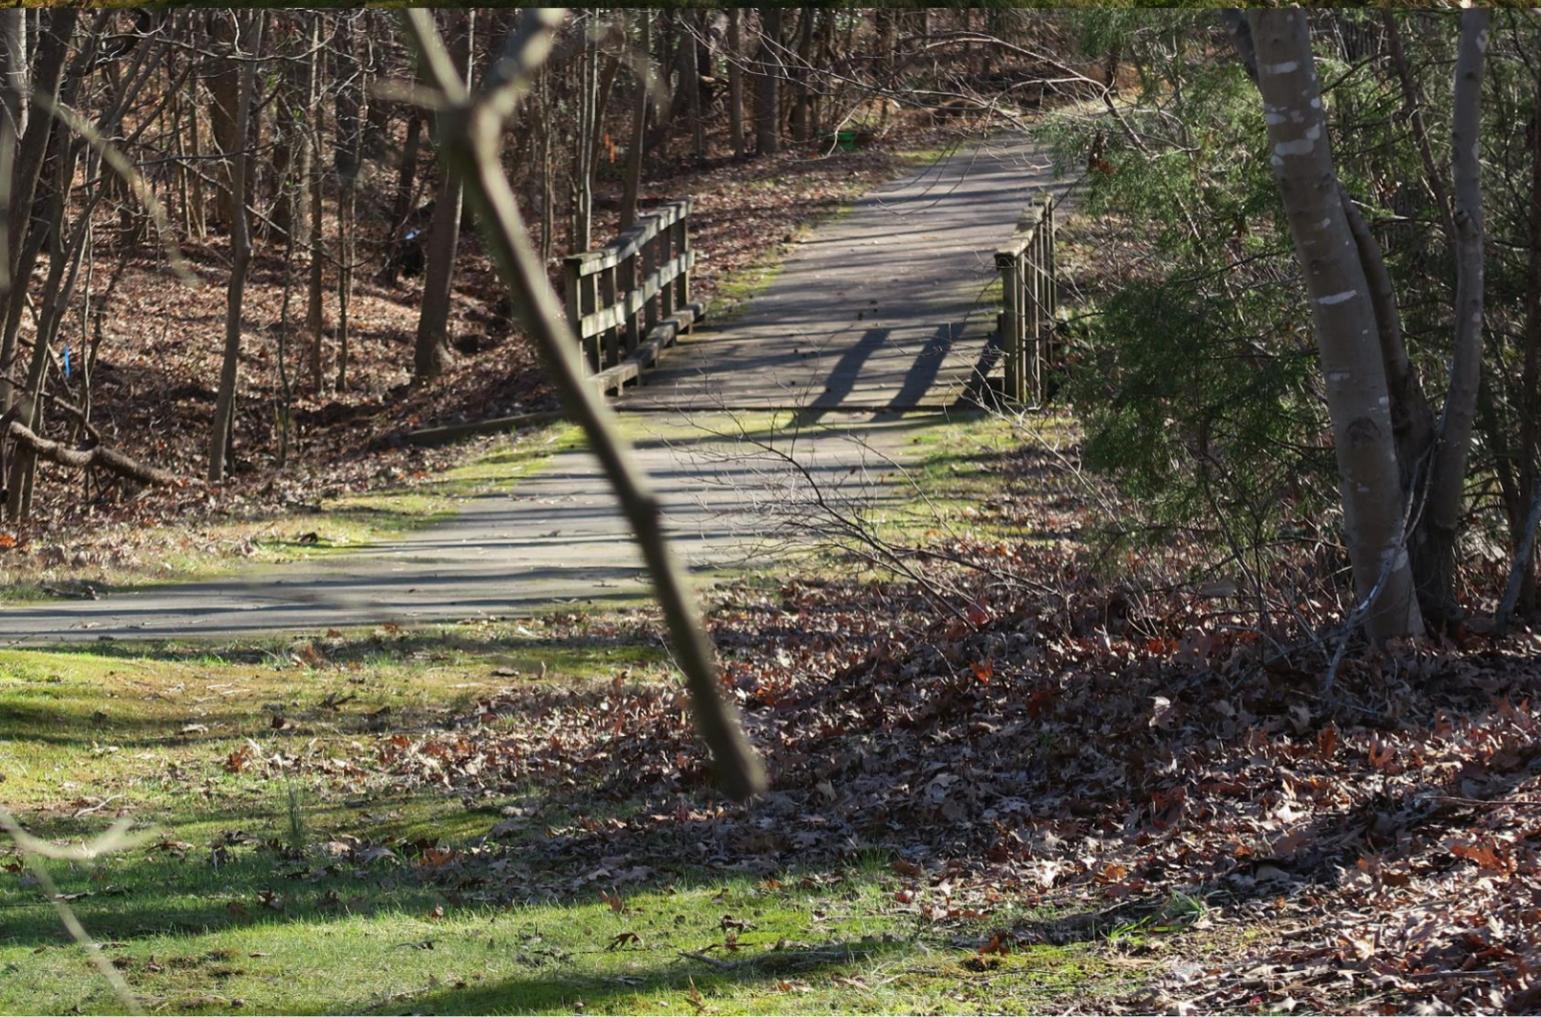

Hi, I am Vicki. I am an artist and designer. My specialty is amenity for infrastructure. I will be working with the Town's Design Team to humanize the Crabtree Creek Pedestrian Tunnel, part of the Crabtree Creek Greenway. I am looking forward to working in your community. For more information about me, see: vickiscuri.com

This New Pedestrian Tunnel will connect the Weston Trail with the Crabtree Creek Greenway, providing access to a regional trail system and Lake Crabtree. The project is currently at 30% design and is expected to be at 100% design later this year. This tunnel crossing under the Weston Parkway will provide a "missing link" in the trail system, allowing pedestrians and cyclists to safely cross without negotiating traffic. I visited the site in early January 2020 and the following images will inform my inspiration for concrete patterns and design.
