STANDARD CONSTRUCTION EXIT WASH RACK

**THE FOLLOWING IS AN EXAMPLE OF AN ACCEPTABLE WASH RACK. OTHER APPROVED METHODS MAY BE UTILIZED.**

- Pressurized water source (contingent upon water main installation)
- Provide drainage away from the wash rack to a sediment-trapping device.
- Keep a broom and shovel close to the rack to clean the street.
- Wash rack
- Foundation of 8" compacted crush and run stone
- Geotextile fabric

**Note:**

- It is advisable to provide a separate entrance to limit traffic across the rack and reduce wear and maintenance.
- The location must slope away from the street or steps must be taken (grading, diversions, etc.) to prevent runoff flowing into the street.
- The effective date is 12/10/09.
